

HEALING ART

ARTWORK FOR HEALTHCARE ENVIRONS

Volume 4

Curated by STUDIO EL

ART

Consulting
Publishing
Design
Framing
Installation

Studio EL Healthcare serves the project specific demands of the healthcare design industry. We are committed to cultivating healing environments through art and visual experience. Direct relationships with artists, in house publishing, manufacturing capabilities, design expertise and customer care set Studio EL apart, bringing all aspects of art consulting under one roof. A carefully curated image collection emphasizes stress-reducing artwork for hospitals, medical suites and offices, as well as senior living communities and memory care.

Consistently developing new art finishing options, Studio EL Healthcare provides products within parameters of most health and safety regulations. Edge Framed Canvas is a puncture resistant, framed canvas that is finished with an extra layer of varnish for durability. The PanelScope collection of multi-paneled artworks suits large public spaces. And finally, our Dimensional Artworks are designed with multiple substrates layered to create sculptural art options.

There is a connection between art and healing. Studio EL Healthcare is committed to promoting this concept within healthcare and senior living environments. Artwork is a catalyst in creating spaces that foster restoration, connection and healing on both physical and emotional levels.

At Studio EL Healthcare, we make this inspired concept a reality!
