

LUXE Editions by Studio EL **fine art prints on unique substrates**

Certified to be authentic:

Your exclusive artwork is limited to a size edition of 25 prints. Each artwork includes a Certificate of Authenticity hand signed by the artist.

LUXE Editions are innovative works of art that break the traditional barriers of fine art prints. Each artist has specifically developed imagery suitable for printing on alternative substrates and materials. However, these works of art are also similar to a traditional giclée in that the technologically advanced printing process is able to achieve astounding detail, continuous tone and an amazing range of colors. Our inks are also 'green' and do not have VOC's (volatile organic compounds).

General Care:

Despite the durability of the UV inks it is important to properly care for your LUXE Edition fine art print. Please handle the artwork with the provided cotton gloves to avoid fingerprints or scratching yourself on the edges, which may be sharp. Please be sure to install your artwork in a safe location where the edges and corners will not come into contact with delicate furnishings. Hang your artwork out of direct sunlight and never clean with liquids or other cleaning products. If cleaning is needed use a soft, dry cloth or feather duster to avoid damaging your artwork.

Brushed Aluminum:

The aluminum panel used is extremely lightweight, rigid and stable due to its 3-part construction. The face layer of brushed aluminum and back layer of painted (coil-coated) aluminum trap a solid polyethylene core to create a 1/8" panel that will not warp. In addition, this substrate is completely waterproof making it ideal for high humidity locations. The ready-to-hang option includes 2 aluminum cleats bonded to the reverse with architectural grade adhesive to float the artwork about 1" from the wall.

Clear Acrylic:

We chose clear acrylic for its aesthetic qualities, as well as its light weight and impact resistance. The material is a substantial 3/8" thick and the edges have been polished for a clean, refined look. We print directly to the reverse side, which helps protect the image from abrasion. As with all acrylic products it is very important to avoid contact with ammonia based cleaners. The ready-to-hang option includes holes at each corner and brushed aluminum stand-off hardware to float the artwork about 1" from the wall.

Sustainable Bamboo:

The 100% bamboo panel is 1/2" thick and 3-ply to prevent warping. It is sustainably grown and harvested to ensure all the wonderful attributes associated with bamboo, including strength, hardness as well as natural resistance to moisture, mold, mildew and termites. We chose to keep the natural, blonde color of the wood so that the images would show up clearly. The edges have been sanded to produce a clean refined look; although, as with all natural products there are unique characteristics inherent to each piece. The ready-to-hang option includes an aluminum frame fastened to the reverse to float the artwork about 1" from the wall.
