wood grain

BLONDE
wood grain

WHITE
satin finish

One of our most popular products combines the durability of contract canvas with the look of framed canvas.

Edge Framed Canvas (EFC) is an archival print on polycotton canvas stretched around a hardboard and varnished making the art puncture resistant. The canvas is then framed with a MDF frame in a variety of finishes.

MDF frame shows 1/4" on face and measures 1 1/2" in depth. Security hardware is standard.

Finishes include **NEW** metallic GOLD and SILVER, Espresso, Cherry and Blonde (all with wood grain) and solid Black or White.

Specified artwork size will be the outer dimensions of the finished framed product. Artwork will be printed to accommodate framing.

Print Specifications

Ink	High performance, low VOC, eco solvent ink
Canvas	65/35 PolyCotton canvas (21 mil/400 gsm) mounted to hardboard
Coating	Scratch Resistant, UV inhibiting, Anti-fungal, Aqueous-based, High-gloss Varnish

Frame Specifications

Face Dimension	1/4"
Distance, wall to face	1 1/2"
Material	MDF with laminate finish
Finish Options	White, Blonde, Cherry, Espresso, Black, Silver and Gold
Hardware	Security, unless otherwise specified

PLEASE NOTE: Specified size refers to the finished frame size, NOT image size. Image will always be cropped 1/4" on each side to accommodate frame.

If unconventional display method is employed, test properly per individual application.
